The History Test - (IVC + Vedic)

Section A

I

1) The Mesopotamian Civilization is situated near the tigris river in the mordern day Iraq in the middle east.

2) Harrapa was the first site ~~a~~ encavated of the Indian Valley Civilization.

3) The Grannary of Mohenjodaro was the largest building in Mohenjodaro.

4) The most common ornaments found in the encavation were necklaces, nose-rings, finger rings, bangles and earings.

5) The Dancing girl was found in Mohenjo-daro.

6) The Early Vedic period was when the Rig-Veda was written. Which was somewhere between 1500 to 1000 BCE.

7) Term 'Veda' ~~have~~ has been derived from a Sanskrit word known as 'Vid' which means knowledge.

8) 'Shruti' was knowledge that was ~~so sacred that~~ revealed to sages by gods orally.

9) The Oldest religious text in the world is the Rig Veda.

10) The Dockyard was discovered in Lothal in Gujreth.

II

1) The Bearded man was a piece of sculpture that was excavated in Mohenjo-daro. The Bearded man is wearing a shawl with his eyes half open showing that the man was maybe meditating.

2) The Seals were of great importance to the researchers because of two main reasons. First is that the seals were used to mark goods and these seals have been found in many places depicting that trade existed. Second is that the seals have different markings which gives us a better understanding of the civilization

3) The Citadel is the higher elevation land of the city which consists of all important buildings and it also houses the ruling class.

4) The Vedic Period was divided into the Early Vedic Period (1500 BCE - 1000 BCE) and Later Vedic Period (1000 - 500) BCE.

5) The Vedas are:
(i) Rig Veda (ii) Sama Veda (iii) Yajur Veda
(iv) Atharva Veda

Section - B

III 1) Some Traits of a Civilization are :-

- -> Division of Labour
- -> Public Infrastructure
- -> Surplus food
- -> Development of Technology
- -> System of Writing
- -> Evolution

A Civilization has a certain way in which the Society Functions. Like who rules, who farms, who prays. And for a Civilization to occur, the Society should have reached an advance stage.

A Civilization has a lot of Technologyical Development. The Civilizations have to grow in order to survive. So new types of tools are made, weapons are made more durable. If there is nothing new being developed in a Civilization, then the Civilization cannot sustain.

2)

Many People believe that the Harappans have migrated from somewhere else and are of foreign origin. The reason for them to believe that is that they believed that they had migrated from Mesopotamia.

Scanned with CamScanner

But that is very unlikely because there are huge differences between the two civilizations.

The other possibility is that Harappans were Indeginous people of the Indian Sub-Continent and that they belonged to the soil of India.

Because the Foreign Origin theory is very unlikely, I believe that the Harappans were Indeginous people of India.

IV

1) The Decline of the Indian Valley Civilization is one mysterious thing. There are multiple theories behind why Harrapa declined. First is the Aryan Invasion Theory which is explained below.

The Aryan Invasion theory states that the Indo-European tribe called "Aryans" had invaded the Harrapan Lands and because Harrappa had never fought a foreign invasion, it declined. But this theory is highly unlikely because the skeletons that were found showed no sign of a massacare.

The other theory is that Harappa declined due to natural disasters. This theory is highly likely because at the time of the decline, the rivers started to dry up, causing the decline of Harrapa.

2)

→ Each city was divided into two parts. The higher elevation ground (citadel) and the lower ground. The citadel was the important part of the city which contained important buildings.

→ The Main Streets followed a grid pattern

→ The smaller lanes cut the main streets at 90° angle forming a block pattern

→ The drains of houses were connected to the main drains forming a good drainage system.

→ The houses at the corner of main streets were rounded to make the travell of carts easier.
